http://www.iceoplexatsouthpointe.com/icoplex_7045.html

Cost: Dinner provided, admission is \$20.00, Students \$ 12.00
Please RSVP by 12:00 pm February 22, 2012

RSVP: Register Online at www.isapgh.org or contact Lance Conklin by phone or e-mail (412-527-7184) Lance.Conklin@eci.us

Overview: Endress+Hauser cordially invites you to a discussion on Ethernet/IP enabled instrumentation, advanced meter diagnostics, and the combined impact that they are having on plant maintenance techniques. We will discuss how EtherNet/IP can significantly reduce the costs associated with field device integration in a process control environment. We will also discuss real-world application successes using advanced meter diagnostics in the Marcellus Shale.

Background: Kevin Lavelle is a Flow Product Manager based out of Philadelphia with responsibility for Coriolis, Electromagnetic, Vortex, Ultrasonic, and Thermal flow technologies.
